

Peninsula Community Planning Board

Wednesday, June 13, 2007, 10:30 am, 3115 Loma Riviera Drive

Project Review Tentative Agenda: June 13, 2007

Please read note at bottom of page regarding the future of this committee

The following are projects that have asked to be on the Project Review Agenda for June:

1. 425 San Gorgonio (David Kemp, Architect). Project # ?? Zell residence.
2. 4343 Osprey Street (Steve Regan Architect). Project # 120774. Furlan Residence.
3. 484 San Elijo (Larry Pappas, Architect). Project # 102640. Allen Residence.
4. 969 Scott st. (Larry Pappas, Architect). Project # 102640. Goff Residence.
5. 1937 Guizot (Mr. Ehm, Architect). Project # 112464. ? Residence.

The following are issues that are either hold-overs, or issues that I have had some form of communication of concern:

5. There was neighbor concern that representatives for the Totah residence (776 Rosecrans) have not fully communicated to their neighbors their change in plans (their architect promised to do so at our May meeting).
6. There is continuing neighbor concern with the Kettenberg Town Homes.
7. There is neighbor concern with 456 Wisteria (Architect ?) Project #128891. Jost Tentative Map. Not yet completed first review at DSD.

From Gregg Robinson,

Again, congratulations to the newly elected Board members, and my sympathy to those not re-elected. I encourage anyone interested to attend the Project Review committee (especially any of our new members who have expertise in this area). I have spoken with Jarvis Ross, and he has graciously agreed to let us have the Project Review meeting this Wednesday at the usual place (3115 Loma Riviera Dr.) and time (10:30 am). We will, however, have to find a new place for the meeting next month. For continuity's sake I ask that the old members (who were not re-elected) of the Project Review Committee to attend this next meeting, but NOT to vote on projects. Cynthia Conger, in particular, has much of the information on current projects (including maps). I have asked her for this information, and she said she will e-mail it to me and attend the meeting. If there are any additional projects that she sends me, I will email an update before the meeting.
