

PCPB Traffic / Transportation Subcommittee

Goals & Objectives

- Provide increased access from Peninsula residential areas to major commercial areas, employment centers and regional activity centers.
- Relieve bottlenecks which limit access to the Peninsula community.
- Improve accessibility for the elderly, handicapped, children and other Peninsula residents who lack access to automobiles.
- Establish adequate parking facilities throughout the community to accommodate existing and projected demand, with consideration given to improving and increasing usage of public transportation.
- Work with MTS to provide a quick, safe and efficient system of public transportation connecting the Peninsula to downtown and other major activity centers.
- Work with MTS to promote increased use of public transit by residents and visitors to the Peninsula by reducing transit travel times, improving service intervals and increasing service penetration.
- Work with MTS and private commercial transportation companies to expand the transit network to provide frequent service to residential, commercial, industrial, educational and recreational uses of the Peninsula, with coordinated linkages to other routes and transportation modes.
- Work with Navy to provide direct efficient transportation between Naval Base Point Loma (top/bottom sides) to relieve traffic on Rosecrans St. & Catalina Blvd.
- Develop & maintain bike paths to connect neighborhoods & encourages green modes of transportation throughout our community and the greater SD Bay.
- Complete the system of public sidewalks, paths and stairways to provide safe and efficient pedestrian access to the residential, commercial and recreational areas of the Peninsula community.
- Public access to the bay and ocean should be provided to the maximum extent feasible consistent with resource protection, protection of private property right, public safety and size of beaches.
