Re: Intersection of Catalina Blvd at Santa Barbara Street and Hill Street

The intersection of Catalina Blvd at Santa Barbara Ave and Hill Street has been identified as a potentially dangerous intersection due to the “K” deign of the intersection and the topography of the intersection.

The Peninsula Community Planning Board (PCPB) request that the City of San Diego Traffic and Transportation department conduct a traffic study at Catalina Blvd at Santa Barbara Street and Hill Street to identify potential traffic mitigations at the intersection. Once potential traffic mitigations have been identified, the PCPB can provide community-based recommendations to the City of San Diego Traffic and Transportation department.

The Peninsula Community Planning Board voted (0-0) to approve this request.

We appreciate your support.

Sincerely,

Fred Kosmo,
Chair, PCPB
