

Airport Construction Alert: Terminal 2 West Development Program

Pile Driving to Begin at Airport in August 2010

Beginning in August, test pile driving for the foundation of the Terminal 2 expansion will get under way, with increased pile driving activity in September. The piles are needed to provide support for the framework of the 460,000 square-foot addition to Terminal 2.

This activity may potentially impact airport neighbors and customers, and we ask for your patience and understanding.

- To minimize disruption, the holes for the piles will be pre-drilled. However, depending on proximity to the pile driving, you may hear noise or feel vibration.
- Pile driving activity will take place to the west of the existing terminal during daytime hours only, from approximately 7 a.m. – 5 p.m. for a 4 to 6 month duration.

A dual-level roadway will separate arriving and departing passengers and reduce curbside congestion in front of the terminal

The Green Build will provide a more comfortable passenger experience, with enhancements including:

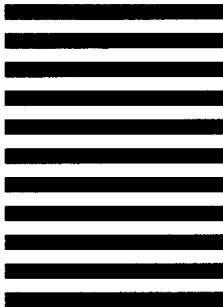

- Curbside check-in, where most passengers can check in, print boarding passes and check baggage before entering the terminal
- More shopping and dining options
- More security lanes

The expanded terminal will provide larger passenger waiting areas at the gates
